

LLD2(KPT1、HFKPT1) Series Deviation switch 系列跑偏开关

产品性能 Performance

本产品系改进开了产品，适用于AC380V DC220V 电流5A的电流线路中，作机床自动控制，限制运动机构动作式自动化程序控制之用。

It is ameliorated products. It is applicable to AC 380V DC 220v. Current 5A and used to automatic controller and limit moving, or used to operate and Auto procedure controller

用途 Application

LLD2 两级防偏开关安装在胶带输送机首尾端两侧。可防止胶带边缘的损伤和因胶带机的距偏而引起的物件胶落，是自动报警和停机的一种保护性开关。

LLD2 Double-pole bias switch installed beside head and tail of adhesive type, it can prevent edge of adhesive type from damage and component fall on because of adhesive motor bias. It is protect switch of auto-warming and stop.

LLD2-2
